Introductory Notes

- Due to the increase in use of radiation energy in many industrial applications, radiation shielding has become a crucial topic in order to diminish its hazardous effects. Radiation shields can be of various weights depending on the Description from which they are produced and the area in which they are used. In this sense, polymer composites have taken attention by researchers because it is aimed to obtain shields with good processability, sufficient flexibility, low weight, and subsequent performance properties.
- Epoxy resin is one of the mostly used synthetic polymers as a matrix element in composite material production due to its improving characteristics by means of electrical insulation, chemical resistance, service life, bonding characteristic, and mechanical properties. Besides, epoxies have intermediate radiation shielding characteristics as well.
- By loading epoxy matrix with fibers and/or fillers having different radiation absorption rates or mechanical resistance properties, multifunctional shields can be produced to serve in numerous applications.
- All our devices are a fusion of Karl Welz' Orgonite and Slim Spurlings tensor ring technologies. Technically, these are hybrid orgone generators or hybrid OGs. Tensors are not only *amplifiers* of subtle energies, they also act as *harvesters* and *rectifiers* of ambient harmful EMF radiation.
- We are grateful to the pioneering works of Nikola Tesla, Wilhelm Reich, Kar; Welz, Don Croft, John Loohan, Walter Russell and Viktor Shauberger.
- Our resin curing process combines Rife frequencies, Solfeggio frequencies, Brainwave frequencies, crystal bowls healing sound, wealth affirmation, and esoteric frequencies to protect against dark magic. The cymatics signatures are unmistakable in all that we do.
- The metal shavings we use in our orgonite are brass, cast iron, and blue steel ONLY. *We use the finer shavings so that the space between shavings is less than the wavelength of 5G frequencies.*
- These are the standard powdered quartz and gemstones which we mix with the metal shavings—black tourmaline, amethyst, citrine, green aventurine, lapis lazuli, turquoise, clear quartz, rose quartz, bloodstone, tiger's eye. Using powdered crystals enables a substantial expansion in the aggregate surface area which directly gives off negative ions when compressed by the resin.

- **The primary function of our orgone generators is the rapid transmutation of deadly EMF ambient radiation into healthy orgone, prana, chi.**
- **The secondary function of our OGs is to assist in manifesting *abundance, good health, vitality, longevity, serenity, psychic protection, and meaningful connections* – to anchor a higher vibration physical rendering of the hologram matrix we are in.**

Pendant – TriVeca

Product	Retail Price PhP
Classic Pendant, Triveca	1440

Description:

- Brass and cast iron metal shavings
- Powdered quartz and gemstones – black tourmaline, amethyst, citrine, green aventurine, lapis lazuli, turquoise, clear quartz, rose quartz, bloodstone, tiger’s eye
- Three 1/9 empowerment cubit tensor rings (spiritual mastery)
- One 1/9 333 Mhz cubit tensor ring (healing)

Dimensions: : 1 cm x 5cm

Notes:

The Tri-Veca or Trinity Code and Bi-Veca Code represent the mathematical coding releases for time continua. The tonic translation, or the pure tonal signature of density 5, represented by the Tri-Veca Code is Ha'Sha, and the corresponding tone we use to activate this code is "Kee' Ra Sha Ha' Sha." The Bi-Veca code releases two time continua into each other and the Tri Veca is the code that can take those and link them into Inner Earth and are they visual translations of the mathematical coordinates of the Bridge Zone time vector.

The Tri-Veca represents a specific mathematical program that allow bio-fields and planetary grids to open up pillars of frequency between here, Inner Earth, and the meajhe time cycle. The eyeball part of the Tri-Veca code, the Trinity Code, is the transharmonic conversion point, the Eye of Elohei, the place which connects to the middle time zone, the Inner Earth time zone which leads up to the Shield of Aramatena area in Density-4

Classic Orgonite Pendant, 333 Mhz Cubit

Product	Retail Price PhP

Notes:

The Tensor field concentrates around the core of the coil,

A personal favorite - this sophisticated coil functions as an energy vacuum cleaner, drawing in and transforming energy through its charged ends before releasing it back, completely transmuted.

“Coils within coils” – huge secondary electron emissions from the interaction between the Acu-Vac coils inside the double terminated organite and the Acu-Vac coil wrapped around the organite.

Our in-house clairvoyant perceives the Acu-Vac coil giving a stable vertical energy field regardless of the position of the coil – perfect for energetic shielding. of the vertical human aura.

Starship Rodin Coil Feedback Loop Double Twisted Copper Tensor Orgonite Pendant

Product	Retail Price PhP
Starship Rodin Coil with Feedback Loop Pendant	4200

Description:

- Brass and cast iron metal shavings
- Powdered quartz and gemstones – black tourmaline, amethyst, citrine, green aventurine, lapis lazuli, turquoise, clear quartz, rose quartz, bloodstone, tiger’s eye
- Empowerment Cubit Feedback Loop Doubletwisted Copper Tensor Coil
- Starship Rodin coil Doubletwisted CopperTensor

Dimensions:

Notes

Another one of our personal favorites. The geometry of the Rodin Starship Coil gets a tensor upgrade. The 333 Mhz Cubit ring is used to program the healing intentions. Blending the two exotic coils provides intense secondary electron emissions. The choice of double twisted tensor copper coil and the copper gauge maxes out the negstiver ion yield per unit weight of copper per volume of the orgonite maxrix.

Perfect for healers and grid workers who can use the extra energy.

For healing, protection, and manifestation accelerator.

Sri Yantra, a mystical diagram that represents the flow of energy in the universe. Use the Sri Yantra for balancing chakras, manifesting dreams, and spiritual transformation.

The Sri Yantra, often revered as one of the most powerful and sacred symbols in Hinduism, is a mystical diagram that encapsulates the very essence of spiritual enlightenment and cosmic energy. Known for its complex geometry, the Sri Yantra is not just a symbol of the Divine Feminine but also an instrument for meditation, bringing harmony, prosperity, and spiritual growth.

The term “Sri Yantra” is a Sanskrit phrase where “Sri” means wealth, prosperity, or divine energy, and “Yantra” translates to instrument or machine. Therefore, the Sri Yantra is often called the “instrument of wealth” or “tool for achieving success.” It is a form of sacred geometry believed to represent the cosmos and the human body in perfect harmony.

This intricate symbol consists of nine interlocking triangles that radiate from a central point (bindu), forming a web of 43 smaller triangles. These triangles are said to represent the cosmic creation and the

Divine Mother, making the Sri Yantra one of the most potent and revered yantras (spiritual diagrams) in Tantra and Hinduism.
